

Patent claims

1. The use of cyclodextrins for the manufacture of preparations for reducing the production of sebum or the use of cyclodextrins for the manufacture of preparations for
5 the removal of sebum.
2. The use as claimed in claim 1 for preventing the formation of comedones and/or acne.
3. The use as claimed in claim 1 for preventing or removing seborrhic phenomena, in
10 particular greasy hair, but also dandruff.
4. The use as claimed in claim 1, wherein the cyclodextrin or cyclodextrins is/are chosen from the group α -cyclodextrin, β -cyclodextrin, γ -cyclodextrin and δ -cyclodextrin, and from the group of mixtures of cyclodextrins which comprise at least 30% by weight, based on
15 the total weight of the cyclodextrin mixture, of γ -cyclodextrin.
5. A cosmetic method for controlling blemished skin, acne, or seborrhic phenomena, in particular greasy hair and/or dandruff, which comprises bringing the cyclodextrin or cyclodextrins, in a suitable cosmetic or dermatological carrier, into contact with the area
20 affected by increased sebum production.
6. The use as claimed in claim 1 or the method as claimed in claim 5, wherein the cyclodextrin or cyclodextrins are used corresponding to a content of 0.0005 – 50.0% by weight, in particular 0.01 – 20.0% by weight, based on the total weight of the composition.
25
7. The use as claimed in claim 1 or the method as claimed in claim 5, wherein the cyclodextrin or cyclodextrins are used corresponding to a content of 0.02 – 10.0% by weight, preferably 0.02 – 5.0% by weight, particularly advantageously 0.5 – 3.0% by weight, in each case based on the total weight of the composition.
